Welcome to our series products of safes (cabinets) and lock boxes. Please read the instruction manual carefully before use, and operate correctly according to the instructions.

### 1. Product Unpacking

-1-

#### 3. First-time Use

1. After placing the box in position, first open the electronic panel battery cover (the keuhole is inside the battery compartment). Insert the key into the keyhole and turn it counterclockwise, then turn the handle clockwise to open the door. Install four AA batteries into the battery compartment on the electronic panel

2. For convenience, please store the instruction manual and keys in a secure place, and do not place them inside the box.

#### 4. Password Setup

1. Open the box door, press the setup button on the back of the box door, and the yellow light on the electronic panel will illuminate twice while you hear a "beep" sound. The yellow light will stay on continuously. Then, enter 3-8 digit password and press "\*" or "#" to confirm. The yellow light will illuminate twice, and the buzzer will sound twice, indicating that the setting is successful.

2. The factory default password for this product is "159". To ensure security, please reset your personal password before using it.

### 5. Door Opening and Closing Operations

Enter the correct password, and after entering the password, press "\*" or "#" to confirm. If you hear two "beeps" and the green light illumingtes, it indicates successful entry. Rotate the handle to open the box door. If the uellow light flashes and you hear three "beeps," it means the password entered is incorrect, and you need to input the correct password again.

-2-

#### 6. Emergency Opening

If there is a malfunction in the electronic system or if you forget the password please use the spare key to open the door. The method of opening is the same as the first time.

#### 7. Alarm Instructions

1. Incorrect Password Self-Locking Function

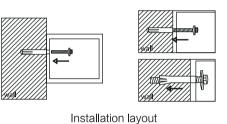

If three consecutive incorrect passwords are entered, the system will triager an alarm, and the electronic panel will lock for 20 seconds, during which the electronic panel cannot be operated. If three consecutive incorrect passwords are entered again, the system will triager an alarm. and the electronic panel will lock for 5 minutes, during which the electronic panel cannot be operated.

2. Low Battery Voltage Warning

If the battery voltage is low, a red indicator light on the electronic panel will illuminate, reminding you to replace the batteries.

#### 8. Installation Instructions

For the sake of safety, please be sure to fix the cabinet on a solid concrete wall.

-3-

#### 9. Usage Precautions

1. Do not put the user manual, main lock key, emergency key inside the box. Store them in other safe places.

2. If the product is not used for a long time, the battery should be taken out to prevent leakage from damaging the electronic system.

3. For safety, be sure to secure the container to a solid concrete wall.

4. Do not deposit excess cash and valuables without an on-duty or remote alarm device
