3. initial Use

1. After placing the box, open the lock cover first, use the key to open the door, and install four AA batteries into the battery compartment on the back of the door.
2. For convenience, please store the user manual and keys in a secure place, do not inside the box.

4. Password Setup

1. Open the battery compartment cover on the back of the door, press the reset button once, and when the yellow light is on, you can start setting the password.
2. The password length is 3-8 digits. After entering the password, press the "A" or "B" key to confirm. Hearing "beep" twice indicates successful entry. If the yellow light blinks and you hear "beep" three times, the password entry is invalid and press the settings key again.

5. Door opening and closing operations

1. Enter the correct password, and after entering the password, press the "A" or "B" key to confirm. Hearing "beep" twice, the green light will be on, indicating successful entry. Turn the handle to open the door. If the yellow light blinks and you hear "beep" three times, the password is incorrect and needs to be retried.
2. The default factory password is 159

- 3 -

6. Alarm instructions

1. Self-locking due to incorrect password input

If three consecutive incorrect passwords are entered, the system will sound an alarm, and the electronic panel will lock for 20 seconds, during which the electronic panel cannot be operated. If three consecutive incorrect passwords are entered again, the system will sound an alarm, and the electronic panel will lock for 5 minutes, during which the electronic panel cannot be operated.

2. Low Battery Voltage Alarm

If the battery voltage is low, a red indicator light will illuminate on the electronic panel to remind you to replace the batteries.

7. Installation instructions

Fix the safe in the place which is not easy to move.

Drill holes for expansion bolts (or clamping screws) in the right place.

Turn the expansion bolts counter clockwise to separate.

Use the expansion bolts (or clamping screws) to secure the case to the wall or floor.

Make sure the case is mounted in place as required and then tighten all screws.

CAUTION: Use the expansion bolt when there is a concrete wall surface.

Use the clamping screw when there is a wooden wall surface.
